Art Unit: 1713

DETAILED ACTION

1. The Amendment filed by Applicant on 10/19/2006 has been entered.

2. New claim 42 is added.

Response to Amendment/Arguments

3. Applicant's amendment and arguments filed on 10/19/2006 have been fully considered and they are found persuasive.

4. The rejection of claims 14-41 under 35 U.S.C. 102(b) as being anticipated by Wandelmaier et al., U.S. Patent No. 6,451,896 (hereinafter "Wandelmaier") is withdrawn.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 1 and 42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant

Art Unit: 1713

regards as the invention. The Applicant recites the phrase "solvent-developable." However, the specification does not recited the phrase and the explanation of the phrase in the Remarks is confusing. The Examiner suggests the Applicant deletes "solvent-developable" not to surrender subject but to move the claims to allowance.

7. Claims 26-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Allowable Subject Matter/Reasons for Allowance

8. Pending a response to overcome the 35 USC 112 rejection claims, 25-42 are allowable.

9. The following is an examiner's statement of reasons for allowance: The closest prior art located or identified by the Examiner is Wandelmaier. Wandelmaier teaches a method for preparing an aqueous coating composition comprising (1) preparing a special effect pigment composition comprising a special effect pigment, polyacrylate water-dilutable resin and additive including surface active ingredient; (2) preparation of

Art Unit: 1713

a layered silicate; (3) at least one binder composition comprising a polyurethane water-dilutable resin. See Wandelmaier, col. 2, line 20 through col. 3, line 7; col. 5, lines 36-43; col. 9, lines 36-61. The Examiner has decided in light of the present amendment to give "the flexographic printing elements" patentable weight. Wandelmaier does not mention "the flexographic printing elements" limitation and references that mention "the flexographic printing elements" do not disclose the layered silicate limitation.

10. As of the date of this final office action, the Examiner has not located or identified any reference that can be used singularly or in combination with another reference including Wandelmaier to render the present invention anticipated or obvious to one of ordinary skill in the art.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 1713

Conclusion

12. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

13. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
